

ROLL-UP TRAFFIC SIGNS

DESCRIPTION

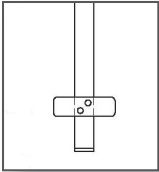

- » Pictograms of your choice:
 - See the options in the Work Zone and Regulatory sections
 - Custom-made
- » Shape: square, diamond or rectangular
- » Quilted vinyl signs for greater durability
- » Velcro strap keeps the sign rolled up
- » Easy assembly: the back of the sign has pockets for inserting the ribs and grommets that fit onto the pins

Info+

- » Together, the post and the weight make a compliant, safe product even when space in response vehicles is at its tightest (minimum space and weight).
- » This system makes you more visible and better protected than 28" cones
- » The posts break away on impact to prevent accidents.
- » Light and easy to handle
- » Taking it down is as easy as setting it up!

CHOICE OF FLAT OR SQUARE POSTS

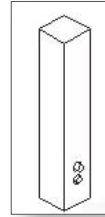

FLAT POST BALISMART - see page 4

The post attaches in seconds without bending over, simply by inserting it into the weight.
Made of fibreglass, light and easy to handle
Thickness 1/4" (6 mm)

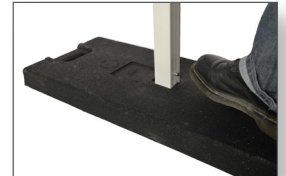

Height: 48" or 60"

SQUARE POST BALIPLAST - see page 4

The post attaches to the weight in seconds, without bending over, thanks to its push-button anchor operated with the foot

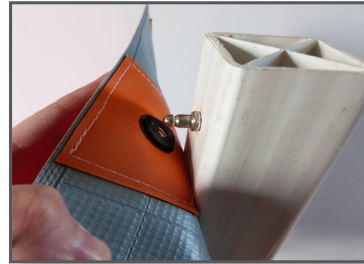

Width: 1 3/4"
Height: 48", 60"
72" or 84"

INSTALLING THE SIGN ON THE POST

Pin for attaching the sign to the BALISMART post

Pin for attaching the sign to the BALIPLAST post

WEIGHTS

BALBC20 : 20 Lbs
BALBC30 : 30 Lbs
BALBC40 : 40 Lbs

ER67

P-060-D sign + BALIPLAST post + weight

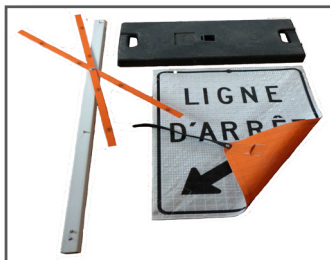

ER77

P-140-1 signs + BALIPLAST post + BALBC30 weight

INSTALLATION AND REMOVAL

INSTALLATION

Retail kit with a weight

Unfold the sign

Insert the ribs into the pockets on the back of the sign

Insert the grommets onto the pins

The sign is ready

Insert the post into the base

REMOVAL

To keep your equipment in good condition, roll up the sign with the pictogram facing in and wrap it with the Velcro strap
