

# BOSS AFAD

BARRIER OPTIMIZED SAFETY SYSTEM

THE NEXT GENERATION OF  
AUTOMATED FLAGGER  
ASSISTANCE DEVICE

- + STRONGER
- + MORE FLEXIBLE
- + SAFER

## BUILT IN CANADA

DESIGN • MANUFACTURING • SHIPPING

- ▶ **SAFE TRAFFIC CONTROL**  
for your teams
- ▶ **POWERFUL ACTUATOR**  
Built for reliable field performance
- ▶ **COMPACT AND ERGONOMIC DESIGN**
- ▶ **HIGH VISIBILITY**  
encouraging drivers to slow down
- ▶ **COMPATIBLE WITH EFFIA**  
+ **OPTIONAL TRUCK-MOUNTED INTEGRATION**
- ▶ **WIRELESS AND WIRED CONTROL**  
(LoRa range up to 1 km)
- ▶ **AUTOMATIC OBSTACLE DETECTION  
AND SAFETY STOP**

On the worksite, it's the **BOSS AFAD**  
that protects your crews!

## WHY CHOOSE THE BOSS AFAD?

- ▶ **Safety Certified:** Compliant with road and safety standards, featuring built-in protection systems (automatic stop in case of obstacles).
- ▶ **Rugged Construction:** Built to withstand intensive use and adapt to all types of job sites.
- ▶ **Designed and Manufactured in Canada:** A guarantee of local quality and fast, reliable service.
- ▶ **Simplified Installation:** Designed for quick setup on multiple mounting systems with minimal effort.
- ▶ **Multiple Gate Options:** Includes two (2x) PVC gate arms for quick deployment, easy handling, and fast replacement. Foldable adjustable gate arm available as an option.
- ▶ **Lightweight and compact design:** Quick setup and can be repositioned by hand

## THE BOSS ADAPTS TO ALL YOUR NEEDS

The **BOSS** combines simplicity and durability while adapting to your operational setup - whether mounted on a truck, mobile box, EFFIA trailer or hitch system.

Two versions, one promise: **protecting your crews.**

The **BOSS AFAD** - designed for today's and tomorrow's worksites.

## COMPATIBLE WITH ALL YOUR OPERATIONS

### FIELDS OF USE

**Town:** Seasonal or short-term roadwork projects.

**Traffic Control Companies:** Daily heavy-duty use and reliable ROI.

**Construction Companies:** Roadwork, excavation, and paving projects.

**Utilities & Telecoms:** Rapid interventions on rural or urban routes.

**Industrial & Mining:** Demanding environments and remote sites.

**Airports & Special Infrastructure:** Service lanes and critical interventions.

## GATE OPTIONS & CONFIGURATIONS

The BOSS AFAD is delivered with two (2x) PVC gate arms:

- **59" – compact and easy to handle**
- **115"– extended coverage for wider control zones**

Both options are lightweight, quick to install, and easily replaceable in the field.

- ▶ **An optional foldable adjustable gate arm (69"–103") is also available, offering a compact storage solution and added flexibility for varying job site conditions.**

## ACTIVATION OPTIONS

STANDARD ACTIVATION INCLUDED WITH EACH SYSTEM

- ▶ Two (2x) wireless keys
- ▶ One (1x) waterproof wired switch, 20' long

ACTIVATION OPTIONS ALSO AVAILABLE

- ▶ Single gate controlled by wired controller
- ▶ Barrier system controlled by a LoRa controller, enabling radio frequency communication between traffic signals (one to four gates)
